# ================================================================================
# Process Name: FastAPI Windows System Administrator Router
# ================================================================================
# Description:
#   FastAPI REST and WebSocket endpoints for Windows system administration,
#   Active Directory operations, user session monitoring, group policies,
#   and security event tracking.
#
# Examples:
#   >>> from fastapi import FastAPI
#   >>> from src.api.router_windows_admin import init_router
#   >>> app = FastAPI()
#   >>> app.include_router(init_router())
#
# File: router_windows_admin.py
# Project: ai-breadboard
# Package: src.api
# Author: hypo69
# Copyright: © 2026 hypo69
