=================
# Process Name: AI Windows Diagnostic & Administration Center
Router
# ============================================================
=================
# Description:
#   FastAPI роутер для центра диагностики, аудита и администри
рования Windows.
#
# Location in project tree:
#   apps/windows/router.py
#
# Dependencies:
#   • fastapi, pydantic
#   • logger – централизованный логгер
#   • apps.windows.* – подсистемы аудита, диагностики и SafeOp
s
#
# Usage example:
#   >>> from apps.windows.router import router, init_router
#
# File: router.py
# Project: AI-Breadboard
# Package: apps.windows
# Author: hypo69
# Copyright: © 2026 hypo69
# Updated: 2026-10-01 06:04:00
# ============================================================
